

SOTRAS

PFAS DECLARATION of CONFORMITY

SOTRAS S.r.l., sited at Via Donatello,13 – Borgaro Torinese (TO), based on information contained on safety data sheet of all components used to manufacture its Air-Oil Separators

DECLARE

Per- and polyfluorinated alkyl substances (hereafter abbreviated as PFAS) are a group of extremely persistent chemicals that are used in many consumer products. PFAS are used in products because they can, for example, increase oil and water repellency or withstand high temperatures. Currently, there are more than 4700 different PFAS that accumulate in humans and the environment.

SOTRAS s.r.l. hereby declares that all our products do not contain PFAS.

SOTRAS s.r.l. does not directly purchase any PFAS.

SOTRAS s.r.l. products have been manufactured without the intentional use of PFAS.

SOTRAS s.r.l. has processes and procedures in place to ensure that our suppliers meet our expectations. We have communicated our requirements to our suppliers to ensure that PFAS are not used in our products. We have subsequently obtained declarations from our suppliers confirming their commitment and upstream due diligence.

SOTRAS s.r.l. is diligently working to ensure that our supply chain is and remains free of PFAS.

However the filters are designed and manufactured in accordance with the national sound engineering practice and the correct quality control procedures according to our Quality Management System, Certificate UNI EN ISO 9001:2015, in order to ensure compliance to International Standards and safe use.
